

Serial No. 09/768,667

IN THE CLAIMS:

Please replace the previous version of the claims with the following clean version, wherein claims 33-41 have been cancelled, and claims 42-55 have been added.

*Sub
C1*

42. (New) A camera comprising:
a camera body;
a first memory capable of storing image information corresponding to a plurality of photographic frames;
a second memory capable of storing image information corresponding to a plurality of photographic frames;
a reproduction device to receive and reproduce image information recorded on one of the first memory and the second memory; and
a changer for selectively changing between a first condition, in which image information on the first memory is outputted to the reproduction device, and a second condition, in which image information on the second memory is outputted to the reproduction device.

D1

43. (New) A camera according to claim 42, wherein the first memory is detachably mountable to the camera body.

44. (New) A camera according to claim 42, which further comprises a finder for finding a camera subject.

45. (New) A camera according to claim 42, wherein the second memory is fixedly provided inside the camera body.

46. (New) A camera according to claim 42, which further comprises a button for advancing image information to be reproduced by the reproduction device among the plurality of photographic frames.

a second connection electrically connectable to a second recording medium capable of storing image information corresponding to a plurality of photographic frames;

a reproduction device to reproduce image information stored on one of the first recording medium and the second recording medium; and

a changer to selectively change between a first condition, in which the reproduction device and the first connection are placed in communication, and a second condition, in which the reproduction device and the second connection are placed in communication.

48. (New) A camera according to claim 47, further comprising a finder for finding a camera subject.

49. (New) A camera according to claim 47, further comprising a button for advancing image information to be reproduced by the reproduction device among the plurality of photographic frames.

Sub C3

50. (New) A camera comprising:

a camera body;

a first memory capable of storing image information corresponding to at least two photographic frames;

a second memory;

a reproduction device to receive and reproduce image information recorded on one of the first memory and the second memory;

an internal memory for temporarily storing image information; and

a changer for selectively changing between a first condition, in which image information on the first memory is outputted to the reproduction device, via the internal memory, and a second condition, in which image information on the second memory is outputted to the reproduction device via the internal memory.

D1

51. (New) A camera according to claim 50, wherein the first memory is detachably mountable to the camera body.

D1
52. (New) A camera according to claim 50, further comprising a finder for finding a camera subject.

53. (New) A camera according to claim 50, wherein the second memory is fixedly provided inside the camera body.

Cncl
54. (New) A camera capable of supporting a first memory and a second memory, the camera comprising:

a camera body;
a first connection electrically connectable to a first recording medium capable of storing image information corresponding to a plurality of photographic frames;
a second connection electrically connectable to a second recording medium;
a reproduction device to reproduce image information stored on one of the first recording medium and the second recording medium;
an internal memory for temporarily storing image information; and
a changer to selectively change between a first condition, in which the reproduction device and the first connection are placed in communication via the internal memory, and a second condition, in which the reproduction device and the second connection are placed in communication via the internal memory.

D1
55. (New) A camera according to claim 54, further comprising a finder for finding a camera subject.
